## VISION STATEMENT:

We aspire to be a global leader in Electrical, Mechanical, and Civil Engineering, driving sustainable energy production and pioneering cutting-edge technologies that transform the energy sector while minimizing environmental footprint and maximizing social value.

## MISSION STATEMENT:

To be the most trusted, long-term partner to our clients by solving their problems together, with, and from the perspective of the client.

## CORE VALUES:

**SAFETY:** Prioritizing the well-being of employees, partners, and the public in all operations.

**QUALITY:** A commitment to excellence in workmanship, delivering high-quality, durable, and aesthetically pleasing results.

**INTEGRITY:** Operating with honesty, transparency, and the highest ethical standards.

**TEAMWORK:** Fostering collaboration and communication within the company and with clients to achieve shared goals effectively.

**website: [www.levorenergy.com](http://www.levorenergy.com)**

**CONFIDENCE:** We serve with confidence because we know what to do in every area of engineering.

**CUSTOMER SATISFACTION:** Striving to exceed customer expectations through superior service and the final product.

**INNOVATION:** Encouraging creative problem-solving and proactive, forward-thinking solutions to add value to projects.

**SUSTAINABILITY:** Taking responsibility for environmental stewardship and social impact through responsible resource management and community involvement.

**ACCOUNTABILITY:** Taking ownership of actions, decisions, and outcomes, and having a commitment to seeing projects through to successful completion.

**RESPECT:** Treating all individuals, from employees to clients and partners, with dignity and fairness.

**PROFESSIONALISM:** Maintaining a high level of professionalism in all actions, from skilled work to ethical conduct.

## **ELECTRICAL CIVIL MECHANICAL WATER OIL & GAS ENGINEERING CONTRACTORS**

### **OUR SERVICES INCLUDE:**

- We handle engineering procurement construction & commissioning (EPCC) projects
- HV and LV electrical panel design and building
- Oil & gas production optimization and engineering services for CPPS, CPFS and crude oil wells (electrical, mechanicals (static and rotary), instrumentation, water treatment plants, etc.)
- Environmental engineering services
- Electrical engineering and construction management powerline construction transformer & switchgear installation/commissioning, overhead and underground cable installation & termination. Etc.)
- Hydro power plant support services
- Civil works mechanical and manufacturing
- Complex it and computer networking solutions
- Solar energy engineering
- Water system engineering
- Supply of general engineering & construction materials

## WHO WE ARE

Levor Energy Technologies (U) Limited is one of the leading engineering and construction firm registered in Uganda by law we are civil, electrical, mechanical water oil & gas engineering contractors.

We are specialized in executing electrical, civil, mechanical, water, oil and gas engineering projects with a history and track record of successfully completed projects in Uganda, South Sudan and Democratic Republic of Congo.

We have a team of innovative, ambitious and talented engineers, technicians, foremen and managers within the ability to execute engineering projects on time while focusing on timely delivery, quality and safety.

We have much experience in executing EPC projects in the power generation, transmission and distribution sector (hydropower plants, solar and thermal). We also do service & maintenance of switchgear, power transformers, distribution transformers, reactance transformers, GSU transformers and auto transformers. Also, we are specialized in overhead transmission and distribution power lines, substation design & construction, hydro power plant support services, testing and commissioning services, on-site transformer repair & maintenance services and all powerline hardware installation and commissioning services, etc

We also do supply of all power line hardware materials, transformer oil, transformers, substation equipment, power plant generation equipment, etc
